

urbanSHED

International Design Competition

Presentation Requirements

All competitors' proposals must include the list of drawings below and communicate the design concept and intended experience pedestrians would have with the proposed design.

TEXT

Include a 250 word or less description explaining the project's concept, materials, fabrication and installation techniques. This must be included in the upper left-hand of the board. The text must briefly describe the proposed method and condition of the shed to transport and store it when it's not being used.

DRAWINGS

Each entry must include the following technical and three-dimensional drawings of the proposed structure:

1. **A perspective of the corner conditions.** This must be a large, descriptive three-dimensional perspective illustrating how the proposal wraps around the corner of Chambers Street and Broadway. It must be rendered to include the image of the 280 Broadway site. **THIS MUST BE THE MOST PROMINENT DRAWING ON THE BOARD** and must incorporate the photo provided in the Competition Site section of this Brief.
2. **One longitudinal elevation at ¼ inch = 1 foot scale (1:50 scale) along Broadway, the entire length of the building.** This must demonstrate the proposal's relationship to the curb, storefronts, newsstands, coffee cart or any other site-specific conditions.
3. **A transverse section at ¼ inch = 1 foot scale (1:50 scale) through the proposed structure.** This must illustrate its relationship to the sidewalk and 280 Broadway and include a clear illustration of the anchorage system.
4. **A three-dimensional vignette(s) of the pedestrian experience under the shed.** This should be a three-dimensional narrative drawing(s) that visually shows a pedestrian's experience walking through the proposed sidewalk shed. It must include the visual context of 280 Broadway and surrounding sidewalk and street. This can be an image either at night, during the day or both.
5. **Lighting Detail** at ½ inch = 1 foot (1:25)
6. **Sidewalk Shed Outer Sides and Ends Detail** at ½ inch = 1 foot (1:25)

Additional, optional drawings: Competitors may include any additional drawings, sections, elevations, perspectives or images that further communicate the design concept.
